Manage data and optimize operations

Terminal Management TMX software optimizes business operations by managing transactional data and delivering accurate information for bulk material facilities.

Benefits

- **Real-time** order entry, inventory, receipt and report viewing, etc. allow for easy business management
- **Integration** with over 40 ERP and agronomy systems streamlines data input and billing while avoiding dual data entry errors
- **Multiple users** may log in and access the system simultaneously for flexibility
- **Customizable** user access to prevent users from accessing private information or from accidentally changing information
- **Flexibility** to work with multiple interfaces simultaneously to ensure that only the right information is exchanged for total accuracy
- **Web page application** for easy remote access from any smart device

To learn how our systems can help give you control at your facility, please contact your Kahler Territory Sales Manager. Don't know who that is? Visit KahlerAutomation.com/sales to find out!

Terminal Management TMX

Manage data and optimize operations

The **containers functionality** offers detailed container record management, including location tracking, comprehensive reporting, precise traceability, paperless records, inspection reminders, and compliance with EPA regulations.

Optional plant software

• **Container Filling / Tracking 2**
Identify a container, fill it, and sell it

• **Plant Supervisor PSX®**
Control systems to ensure timely dispensing & precise staging

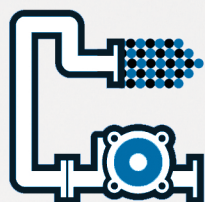

• **Self Serve 2**
24/7 unstaffed, legal-for-trade system

• **Container Filling / Tracking 2**
Identify a container, fill it, and sell it

• **LOADPASS®**
Empower drivers with easy mobile check-in for smooth traffic flow & increased efficiency

• **Truck Kiosk**
Makes scaling trucks easy & secure

• **Truck Scale Management**
Reduce time truck & driver spend in loadout

Product dispensing streamlines facility operations by offering precise product measurements for orders, managing sales and inventory, and enhancing efficiency through configurable systems and email-based reporting.

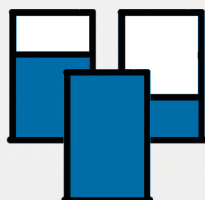

The **receiving functionality** enhances facility efficiency by capturing real-time product data, offering tailored pre-staging options, optimizing equipment control, and providing remote accessibility for streamlined operations.

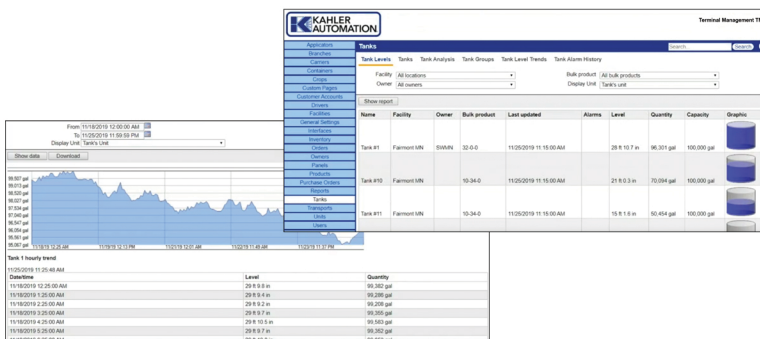

• **Bulk Receiving 2**
Automatically capture data during receiving

• **Panel Server KA-2025**
Makes scaling trucks easy & secure

• **Truck Scale Management**
Reduce time truck & driver spend in loadout

The **tanks functionality** offers precise liquid storage tank monitoring, enhancing inventory efficiency, providing customizable alerts, clear oversight, and remote accessibility for streamlined management tailored to each facility's needs.
